

Food safety and compliance, digital and self-managed

Continuum Food Safety puts your SOPs, forms, logs and verification tasks in one cloud system, on any phone, tablet or laptop. Fully customizable, bilingual, and built to work offline.

PAPERLESS. AUDITABLE. AUDIT-READY.

iOS & Android

Web browser

Online & offline

English & Español

THE CHALLENGE

- Rising requirements from USDA, retailers and auditors
- Mounting paperwork: logs, SOPs, plans, policies
- Constant inspections needing photos and corrective actions
- Oversight at scale, hard to verify by hand

THE SOLUTION

- Digitizes daily, weekly and annual inspections
- Replaces paper folders with secure digital reports
- Keeps every compliance record backed up and audit-ready
- Automatic work orders for out-of-compliance findings

HOW IT WORKS

1 Build your program

Add buildings, locations, areas, monitoring questions and self-audits yourself. No code required.

2 Inspect from the field

Answer on any device, add up to five photos per question. Offline data syncs when connectivity returns.

3 Report and act

Reports generate instantly in PDF, English or Spanish. Alerts and work orders route findings to the right people.

About 30%

Time saved, customer-reported

10

Question types

EN / ES

App, web and reports

Offline

Syncs when back online

Customers report saving about 30% of inspection time when no issues are found, and more when issues are found. Results vary by operation.

Built for How Food Safety Teams Actually Work

Meeting the challenge, feature by feature.

Bilingual

Full English and Spanish support, system-wide.

Access anywhere

Web access from any computer or device with a browser. Native iOS and Android apps for the field.

Fully customizable

Tailor buildings, areas, questions and audits to match your program.

Self-managed

Your team runs it, with no vendor tickets required.

Configurable alerts

Automatic email alerts for out-of-compliance findings, sent to the notification lists you set up.

Certification-ready

Built-in document management for third-party certification compliance.

Ready for the Certifications You Answer To

Import self-audits for the standards your buyers require.

Supplier Verification and Audit-Ready Reporting

Foreign Supplier Verification Program (FSVP) support built in.

SUPPLIER & DOCUMENT CONTROL

- Grant and manage supplier access
- Add or void suppliers' risk assessments and documents
- Add, rename or move folders
- Add, move or void documents

REPORTING

- FDA-ready reports in minutes, for any food safety auditor
- Filter any report by custom date range
- PDF format, in English or Spanish
- Individual page-level security

Mobile-First Execution

Everything works from the field.

Instant push updates

Roll out changes to every device immediately.

Android & iOS

Native apps for both platforms.

Online & offline

Offline data stores on the device and syncs when connectivity returns.

Photo evidence

Capture up to five photos per question.

Instant reports

Self-audit and monitoring reports generate immediately.

Automatic work orders

Out-of-compliance findings automatically generate work orders.

Configure Monitoring and Self-Audits, No Code Required

Your program, your rules, configured by your own team.

- Add, change or disable buildings, locations, areas and monitoring questions
- Add, change or disable self-audits, modules and questions as your program evolves
- Set and adjust scoring points for every audit module
- Up to 4 responses per question; mark any question required or optional
- User notification lists route alerts to the right people automatically

WHAT TO EXPECT

See it built for you

Tell us how you manage food safety today and we will show you the same program in Continuum. Same-day consultations are available.

Free consultation and estimate

Pricing depends on the number of mobile devices that run the Continuum app. People who use it in a web browser do not count toward that number.

Your data, your program

Continuum is a hosted subscription service. Your team builds and manages the program, and you can export your data.
