

Mobile-first quality control for fresh produce

Continuum QC replaces paper-based inspections with a purpose-built app for field teams: faster, bilingual, and fully self-managed. Capture findings and photos on a phone or tablet and send a finished report before you leave the inspection area.

iOS & Android

Web browser

Online & offline

English & Español

THE IMPACT: FROM PAPER TO MOBILE, IN MINUTES

PAPER-BASED PROCESS

80–100 min

Record findings → photos → transfer to Excel → insert & resize photos → email report

CONTINUUM QC MOBILE

18–26 min

Record findings → photos → email or save a PDF report

Time figures come from a produce customer's before-and-after comparison. Results vary by operation.

HOW IT WORKS

1 Build your inspection

Set up commodities, varieties, packs, sizes, conditions and defects yourself. No developer needed.

2 Capture in the field

Record findings, up to five photos per data point, GPS and signature. Works with no signal.

3 Send the report

Press save. Generate a PDF or email it to a preset list, in each recipient's language.

App, portal and reports

The Mobile App

Purpose-built for inspectors working in the field.

Bilingual by design

Field teams work in English or Spanish, side by side, on the same inspection.

Smart commodity assignment

Users are assigned commodities and see only what applies to them.

Online and offline

Online, data uploads immediately. Offline, it is stored on the device until the connection returns.

Rich photo capture

Every question, condition, or defect can record up to five photos, plus GPS and signature.

The Platform

Access, control, and flexibility that don't depend on a vendor ticket.

Access anywhere

iOS, Android, and any computer with a browser and an internet connection.

Bilingual platform

English and Spanish supported across the whole system, web and mobile.

100% self-managed

Your team configures and administers the system directly.

Fully customizable

Tailor commodities, questions, and workflows to how you actually inspect.

Configuration

Everything below can be changed by your team, with no developer required.

- Commodities, varieties, packaging & sizes
- Header & footer questions
- Conditions & defects, or import USDA-standard libraries
- Up to 4 responses and 5 photos per data point
- Optional severity levels: General, Slight, Moderate, Severe, Extreme
- Required or optional, question by question
- Centralized sync: push to devices, or sync from a device

IN THE FIELD

One customer went from 5–6 inspections a day on paper to 27 with Continuum QC.

Governance

Control who sees what, and route reports automatically.

SECURITY

- Individual page-level security
- Role-based mobile app users

REPORTS & DISTRIBUTION

- Generated in PDF; export data to Excel
- Available in English and/or Spanish
- Emailed to a predefined distribution list, in each recipient's preferred language
- Optional: automatically email inspections

Scale

Open the door to your growers, without opening the door to risk.

- Unlimited farmers and growers
- Unlimited inspections
- Optional farmer/grower portal access: permissions let them generate their own reports, with visibility but not control

WHAT TO EXPECT

Your forms, your way

Send us one of your current inspection forms and we will show it built in Continuum QC, often the same day.

Free consultation

Tell us how your team inspects today. We offer a free consultation and estimate.

Start small, grow

Use it on one commodity or many. Inspections, farmers and growers are unlimited.
